JOURNAL OF QUALITY TECHNOLOGY

Index

Volume 34, Nos. 1–4, 2002

ARTICLES

All articles, including material that appears in the Computer Programs and Technical Aids Departments, are listed alphabetically by author and numbered sequentially. These sequential article numbers are used to identify the articles in the Key Words list, which begins on page 470.

1. APLEY, D. W. AND TSUNG, F., *The Autoregressive T^2 Chart for Monitoring Univariate Autocorrelated Processes* . . . . . January, 080–096
2. ATIENZA, O. O.; TANG, L. C.; AND ANG, B. W., *A CUSUM Scheme for Autocorrelated Observations* . . . . . April, 187–199
3. BINGHAM, D. R. AND LI, W., *A Class of Optimal Robust Parameter Designs* . . . . . July, 244–259
4. BORROR, C. M.; MONTGOMERY, D. C.; AND MYERS, R. H., *Evaluation of Statistical Designs for Experiments Involving Noise Variables* . . . . . January, 054–070
5. BOTHE, D. R., *Discussion* . . . . . January, 032–037
6. BOYLES, R. A., *Discussion* . . . . . January, 043–044
7. BURDICK, R. K.; ALLEN, A. E.; AND LARSEN, G. A., *Comparing Variability of Two Measurement Processes Using R&R Studies* . . . . . January, 097–105
8. DAVIS, R. B. AND WOODALL, W. H., *Evaluating and Improving the Synthetic Control Chart* . . . . . April, 200–208
9. HUBELE, N. F., *Discussion* . . . . . January, 020-022
10. JIANG, W. AND TSUI, K.-L., *SPC Monitoring of MMSE- and PI-Controlled Processes* October, 384–398
11. JONES, L. A., *The Statistical Design of EWMA Control Charts with Estimated Parameters* . . . . . July, 277–288
12. JOSEPH, V. R. AND WU, C. F. J., *Operating Window Experiments: A Novel Approach to Quality Improvement* . . . . . October, 345–354
13. JU, H. L. AND LUCAS, J. M., *L^k Factorial Experiments With Hard-to-Change and Easy-to-Change Factors* . . . . . October, 411–421
14. KOTZ, S. AND JOHNSON, N. L., *Process Capability Indices–A Review, 1992–2000* . . January, 002–019
15. KOTZ, S. AND JOHNSON, N. L., *Response* . . . . . January, 051–053
16. KOWALSKI, S., *24 Run Split-Plot Experiments for Robust Parameter Design* . . . . . October, 399–410
17. KVAM, P. H. AND MILLER, J. G., *Discrete Predictive Analysis in Probabilistic Safety Assessment* . . . . . January, 106–117
18. LOEPPKY, J. L. AND SITTER, R. R., *Analyzing Unreplicated Blocked or Split-Plot Fractional Factorial Designs* . . . . . July, 229–243
19. LU, M.-W. AND RUDY, R. J., *Discussion* . . . . . January, 038–039
20. LUCEÑO, A. AND PUIG-PEY, J., *Computing the Run Length Probability Distribution for CUSUM Charts* . . . . . April, 209–215
21. MARTIN, E. B.; BETTONI, A.; AND MORRIS, A. J., *Monitoring of a Batch Continuous Process Using Mass Resampling* . . . . . April, 171–186
22. MASTRANGELO, C. M. AND FORREST, D. R., *Multivariate Autocorrelated Processes: Data and Shift Generation* . . . . . April, 216–220
23. MEE, R. W., *Three-Level Simplex Designs and Their Use in Sequential Experimentation* . . . . . April, 152–164
24. MILLER, A., *Analysis of Parameter Design Experiments for Signal-Response Systems* . . . . . April, 139–151

Technical Aids

26. NELSON, L. S., *A Nonparametric Test for Comparing Any Number of Variances* . . . January, 130–132
27. NELSON, L. S., *Did a Series of Samples Come from the Same Normal Distribution?* July, 339–341
28. NELSON, L. S., *How Statistics Can Improve Mensuration* . . . . . April, 221–222
29. NELSON, L. S., *Statistical Consulting in Manufacturing/Engineering* . . . . . October, 459–461

Book Reviews

Analysis of Messy Data Volume III: Analysis of Covariance by G. A. Milliken and D. E. Jones
. . . . . .L. M. HUGHES July, 342–343

Applied Statistics: A First Course in Inference by F. A. Graybill, H. K. Iyer, and R. K. Burdick . . . . . C. M. BORROR April, 223–224
Applied Statistics for Engineers and Scientists by J. Devore and N. Farnum . . L. ZIMMER January, 133–134
Applied Statistics for Engineers and Scientists by J. D. Petruccelli, B. Nandram, and M. Chen . . . . . C. M. BORROR April, 224–224
Basic Engineering Data Collection and Analysis by S. B. Vardeman and J. M. Jobe . . . . . L. S. NELSON January, 134–134
Design of Experiments Using the Taguchi Approach: Sixteen Steps to Product and Process Improvement by R. K. Roy . . . . . C. M. BORROR October, 462–463
Elementary Statistics by R. Larson and B. Farber . . . . . L. S. NELSON July, 343–344
Experiments: Planning, Analysis, and Parameter Design Optimization by C. F. J. Wu and M. Hamada . . . . . K. A. F. COPELAND January, 134–136
Experiments with Mixtures by J. Cornell . . . . . H. GOLDFARB July, 344–344
Generalized Linear Models with Applications in Engineering and the Sciences by R. H. Myers, D. C. Montgomery, and G. G. Vining . . . . . MICHAEL CONERLY October, 463–464
An Introduction to Statistical Methods and Data Analysis, 5th ed. by R. L. Ott and M. Longnecker . . . . . C. M. BORROR April, 224–225
Multivariate Analysis of Quality, An Introduction by H. Martens and M. Martens . . . . . A. K. SMILDE October, 464–465
Probability and Statistics for Engineering and the Sciences, 5th Ed. by J. L. Devore . . . . . C. M. BORROR April, 225–226
Run-to-Run Control in Semiconductor Manufacturing by J. Moyne, E. Del Castillo, and A. M. Hurwitz, editors . . . . . DAVID DRAIN October, 465–467
Smoothing and Regression: Approaches, Computation, and Application by M. G. Schimek, ed. . . . . J. WISNOWSKI January, 136–136

Corrigenda . . . . . October, 473

KEY WORDS

The numbers listed by the key words are the identification numbers assigned to the articles as listed on the previous pages.

Adjustment Factors; 24
Aliasing; 16
Analysis of Variance; 43, 26
Approximation; 28
Asymmetric Composite Design; 23
Augmented Pair Design; 23
Augmenting Design; 39
Autocorrelation; 1, 2, 44
Autoregressive Processes; 34
Autoregressive Moving Average Process; 10
Average Run Length; 8, 37, 11, 45
Bayesian Prediction; 17

Binomial Distribution; 17
Bi-randomization Designs; 18
Blocking; 13
Calibration; 7
Capability Indices; 14
Central Composite Designs; 4
Common Cause Failure; 17
Confidence Intervals; 35
Count Data; 28
Cumulative Sum Control Charts; 2, 8
Curvature; 31
Design of Experiments; 4, 16, 25, 40
Dual Response System; 41
Dynamic Characteristics; 24
Engineering Process Control; 29
Estimation; 14, 35, 28
Exponentially Weighted Moving Average Control Charts; 8, 37, 11, 30
False Alarm Probability; 45
Feedback Control; 30
Fractional Factorials; 16
Functional Data Analysis; 25
Gauge Study; 7
Generalized Least Squares; 39
Homogeneity of Variances; 26
Hotelling's T^2 Statistic; 1
Integral Equation; 11
Integrated Processes; 21
Inverse Regression; 35
Laplace Distribution; 26
Least Squares; 35
Link Functions; 24
Manufacturing Improvement; 29
Mean; 28
Mixed Model; 7
Mixture Component Effects; 31
Mixture Distributions; 17
Model Ordering; 3
Model Reduction; 31
Model Robust Design; 3
Monte Carlo Simulation; 27
Multivariate Control Charts; 37
Multivariate Gamma Distribution; 37
Multivariate t Distribution; 7
Multivariate Statistical Process Control; 21
Nested Error; 18
Nonconformities; 14
Nonparametric Regression; 43
Nonparametric Test; 26
Optimal Design; 3
Optimization; 12, 41
Performance Measures; 12
Permutation Test; 18
Poisson Distribution; 17
Precision; 28
Process Performance; 21
Process Variability; 29
Quality Control; 10, 38
Quality Improvement; 25
Random Effects; 40
Repeatability; 7
Replicate Measurement Data; 28
Reproducibility; 7
Response Surface Methodology; 4, 23, 39, 41
Restricted Randomization; 13
Robust Estimation; 38
Robust Parameter Design; 4, 12
Runs Rules; 8
Sampling; 28
Sample Size; 45
Second-Order Design; 23
Sequential Design; 12
Signal-to-Noise Ratio; 24, 12
Significance Test; 27
Simplex Sum Design; 23
Smoothing; 43
Splines; 43
Split-Plot Experiments; 16, 13
Stationary Processes; 34
Statistical Process Control; 1, 2, 8, 37, 44, 30, 10, 45, 38
Trends; 40
Time Series Analysis; 1, 2, 44
Unbiased Average Run Length; 37
Variable Selection; 31
Variance Components; 7
Variation Reduction; 25
